SKILLS

Programming Languages:

JavaScript, C#

Frontend: React, HTML, CSS

Backend: Node.js, Express.js

Database: MongoDB, SQL Server

Tools & Technologies: Git, GitHub, Docker, Postman, Vite

EDUCATION

07/2022 - 07/2026

Engineer in Information Technology

Ho Chi Minh City University of Technology (HUTECH)

GPA: 3.15

CERTIFICATIONS

HUTECH's .NET Cracking Challenges 2024

06/2024

CEF B1

19/08/2025

ABOUT ME

Fourth-year Software Engineering student with experience developing e-commerce web applications and backend systems using JavaScript, React, Node.js, and MongoDB. Familiar with RESTful APIs, Git, and modern development workflows.

Seeking a Full-Stack Developer Internship to apply technical skills and contribute to building scalable, high-quality web applications in a collaborative team environment.

PROJECT

BugHunter – Web-Based Programming Learning Platform

08/2025 - 12/2025

Role: Team Leader (2 Members)

- Led a 2-member team to design and develop a full-stack web application focused on bug-fixing programming challenges
- Built a real-time coding environment using Monaco Editor and integrated JudgeO API for multi-language code execution
- Implemented competitive PvP coding matches using WebSocket for real-time interaction
- Developed secure authentication using JWT and bcrypt and designed RESTful APIs with Express.js
- Integrated AI-based error analysis and chatbot mentor to assist users in debugging and learning
- Deployed the system using Docker, with frontend on Vercel and backend on Railway
- Designed scalable MongoDB database schemas for users, challenges, and PvP match data
- Implemented microservice-based architecture for AI analysis and code execution services
- Optimized real-time synchronization for multiplayer coding matches

Technologies include:

- Demo: <https://hunterbug.vercel.app>
- GitHub: <https://github.com/diendan2427/Deploy>

GiftMate - E-commerce Web Application

10/03/2025 – 25/05/2025

Role: Team Member (4 Members)

- Built a multi-role e-commerce platform with ASP.NET Core MVC
- Implemented authentication and role authorization with ASP.NET Core Identity
- Developed product, brand, and category modules using EF Core repositories
- Built cart, checkout, order creation, and confirmation email flow
- Integrated MoMo payment for online checkout
- Added favorites, feedback/rating, and important-date reminders
- Designed SQL Server schema for products, orders, users, and staff applications

Technologies include:

- GitHub: <https://github.com/diendan2427/DoAnCoSo>
